

[e1] Nuclear energy has been proven time and time again to be safe.

[e2] It has been proven, over six decades, to have a minimal impact on the environment,

[e3] as they emit almost no greenhouse gases.

[e4] The chances of anything untoward happening to a nuclear facility are also slim.

[e5] There have been a few nuclear events since Chernobyl,

[e6] but there have been relatively few fatalities associated with it.
