

[e1] Paper and books
will never become
completely obsolete.

[e2] While lots of
people have really
enjoyed all the
technology around
being able to read
electronically,

[e3] lots of people
will always prefer
books.

[e4] Most of these
people are probably
older so as the
older generation
dies, paper books
will become more
obsolete.

[e5] However, due to
funding I don't
think that schools
and colleges will
ever be able to go
fully electronic.

[e6] So there will
always be paper
books out there.
